

Help Advance Concussion Research

AUT

TE WĀNANGA ARONUI
O TĀMAKI MAKĀURAU

Would you like to help us understand how we can track recovery from concussions?

We are looking for people who have **NOT** suffered a recent concussion and want to be involved in research.

You would attend one in-person visit at one of our clinics.

At this visit, we will take a blood sample from your arm, ask you to fill in questionnaires and test your eye-tracking ability with a non-invasive testing device.

Help with research into tracking recovery from concussions.

CONCUSSION?

AUT

TE WĀNANGA ARONUI
O TĀMAKI MAKĀURAU

Would you like to help us understand how we can track recovery from concussions?

We are looking for people who have suffered a recent concussion and want to be involved in research.

You would attend up to seven in-person visits at one of our clinics (as soon as possible after the injury – until recovered).

At each of these visits, we will take a blood sample from your arm, ask you to fill in questionnaires on your symptoms and test your eye-tracking ability with a non-invasive testing device.

We are also looking for people who have **not** had a concussion to be involved in this study. This would only require one visit.
